

Netflix Titles Analysis Dashboard

Interactive Power BI dashboard analyzing Netflix Titles dataset — distribution by type, genre, rating, country, and release year. Prepared by: Jitesh.

Project Objective & Data

Objective

Analyze Netflix Titles and build an interactive Power BI dashboard to surface content-library insights.

Source

Kaggle – Netflix Titles dataset.

Tools

Excel, Power BI, Power Query, DAX.

Data Cleaning & Preparation

Special events	814,971	871,532	871,532
Other expenses	43,790	41,310	41,310
Depreciation and amortization	814,971	871,532	871,532
Bad debt expense	43,790	41,310	41,310
Total Expenses	4,314,133	4,314,133	4,314,133

01

Import & Deduplicate

Imported raw data into Excel and Power BI; removed duplicate records.

02

Fix & Standardize

Handled missing values, corrected data types, standardized text, converted dates.

03

Transform & Load

Applied Power Query transformations and loaded cleaned dataset into Power BI.

Dashboard Features

KPI Cards

Quick overview:
total titles,
movies, TV shows,
countries, genres,
ratings.

Type Analysis

Movies vs TV
Shows breakdown
with interactive
filters.

Rating Insights

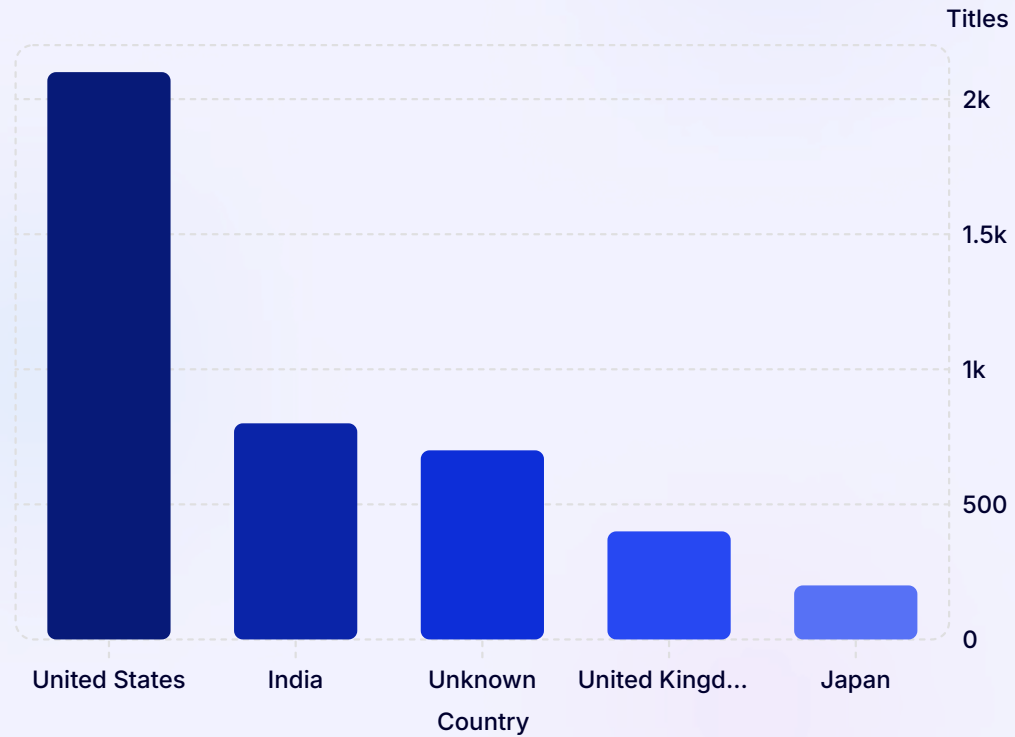

Content rating
distribution (e.g.,
TV-MA, TV-14).

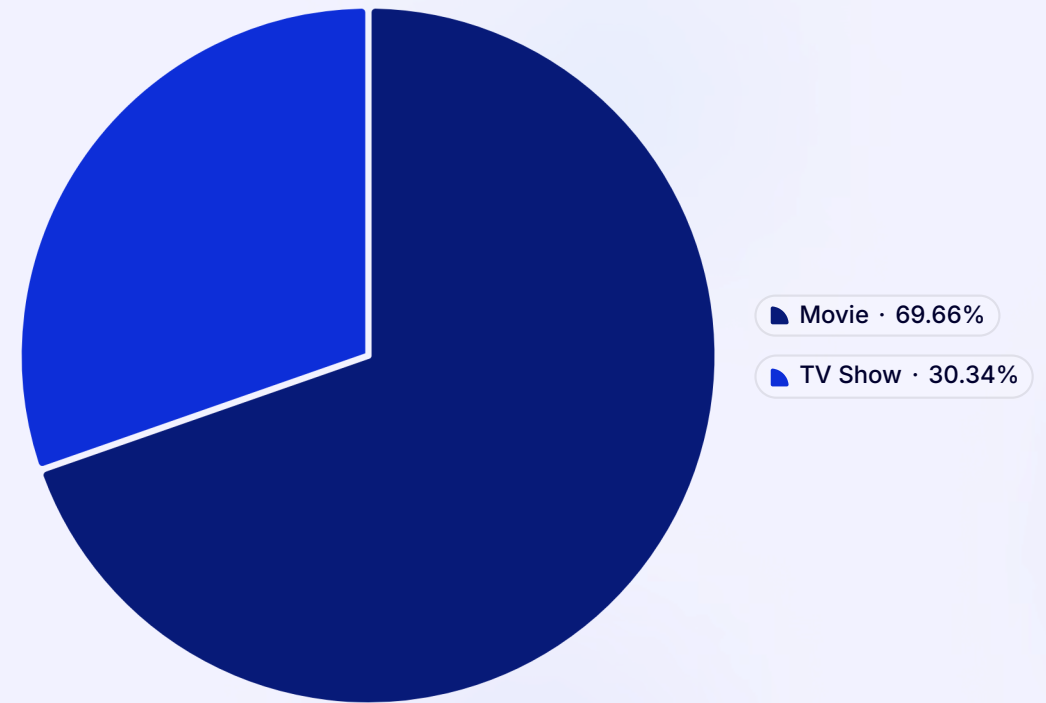

Country Analysis

Titles by country –
US highest,
followed by India
and Unknown.

Key Visualizations

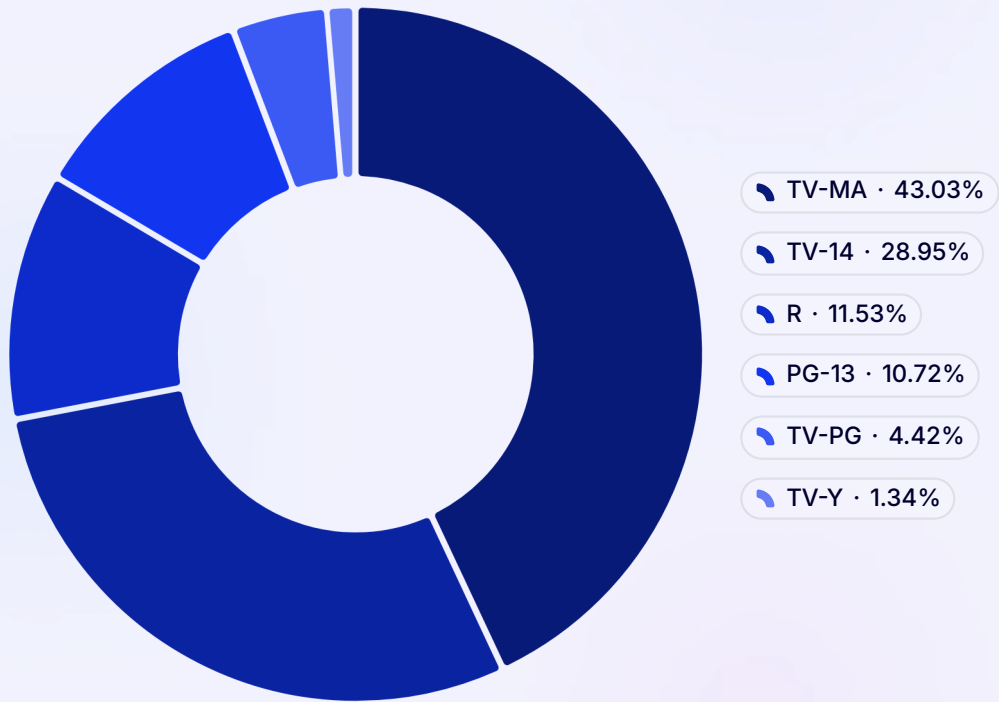

Bar chart: top countries by title count.

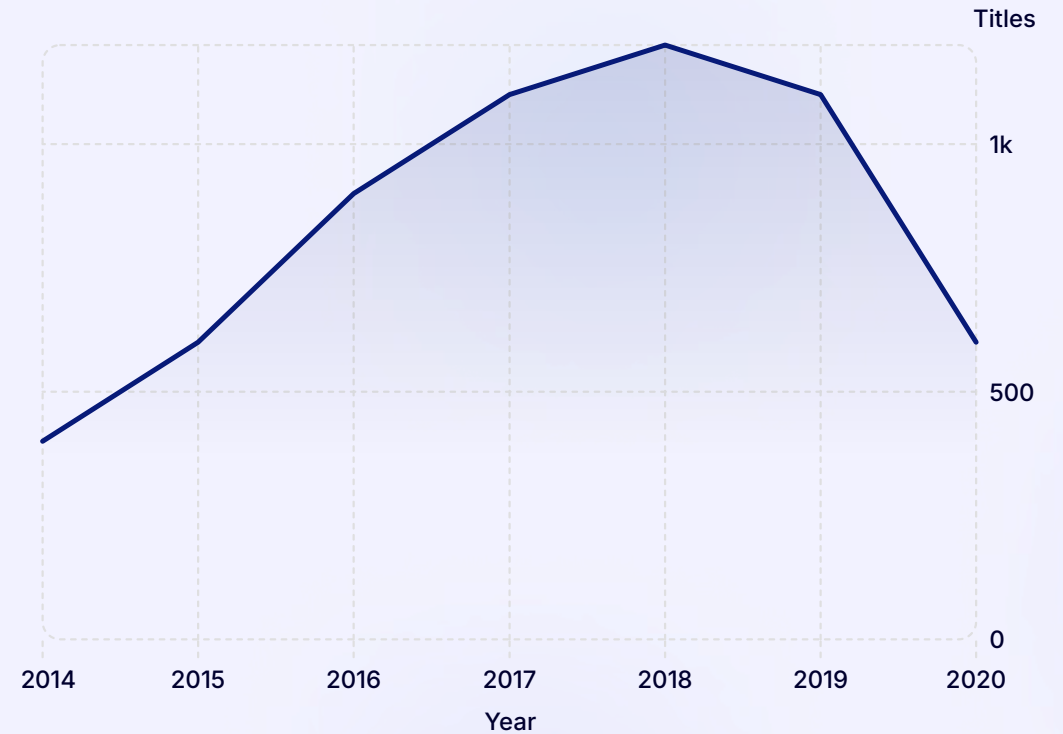

Overall composition: Movies represent the majority (~69.6%).

Ratings & Release Trends

Content rating distribution with TV-MA and TV-14 most common.

Release-year trend: content additions peaked around 2018.

Category & Segment Insights

Top categories highlight strong presence of Dramas and International TV Shows. Category-level counts support content strategy decisions and genre prioritization.

Dramas &
International
TV Shows

Conclusions & Skills Demonstrated

Conclusions

Movies dominate the catalog; US contributes most titles; TV-MA and TV-14 are common; recent years saw increased additions.

Interactive filters enable deep exploration by country, genre, rating, and year.

Skills Demonstrated

Data cleaning, Power Query transforms, DAX measures, data modeling, KPI development, and interactive dashboard design in Power BI.

Outcome

Clean, structured dataset and an interactive Power BI dashboard that turns raw Netflix data into actionable insights for decision-making.
